TECHNICAL SKILLS

Languages : Python, JavaScript, C

Frontend : HTML, CSS, UI/UX design, Bootstrap

Libraries: NumPy, Pandas, Matplotlib

Database : SQLite

Framework: Flask, Django

Developer tools : VS Code, Git, GitHub

Other skill : Render, Video editing

PROJECTS

Smart To-Do Web App

[Link](#)

- Developed a full-stack To-Do web application using Flask, SQLite, and Bootstrap
- Implemented secure user authentication system (login & registration)
- Built complete CRUD operations for efficient task management
- Added task filtering and search functionality to enhance usability
- Designed a dynamic dashboard showing total, completed, and pending tasks
- Integrated modern UI features like dark/light theme toggle, animations, and responsive design
- Deployed the application on Render for public access

Password Generator

[Link](#)

- Developed a full-stack Password Manager Web Application using Flask to generate and manage secure passwords.
- Implemented user authentication system with registration and login using hashed passwords via Werkzeug.
- Designed a responsive and modern UI using Bootstrap with glassmorphism, gradient animations, and interactive components.
- Built a dynamic password generator with customizable options (length, uppercase, digits, symbols).
- Integrated SQLite database to store user-specific passwords securely.
- Implemented password history dashboard displaying the latest 5 generated passwords with copy-to-clipboard functionality.
- Added password strength indicator and input validation to enhance usability and security.
- Applied modular architecture separating backend logic, templates, and database handling for scalability.

Weather App

[Link](#)

- Developed a full-stack weather application using Python Flask with real-time weather data integration.
- Integrated OpenWeather API to fetch live data including temperature, humidity, wind speed, and weather conditions.
- Implemented a 5-day weather forecast feature with dynamic data rendering.
- Created interactive temperature charts using Chart.js for data visualization.
- Designed a responsive and modern UI using HTML, CSS, and Bootstrap.
- Added dark/light mode toggle for better user experience.
- Implemented weather-based animations (rain, clouds, clear sky) to enhance UI interactivity.
- Built a recent search history feature to store and display the last 10 searched cities.
- Deployed the application on Render for live access.
- Improved UX with hover effects and dynamic UI updates.

CERTIFICATES

- Codsoft Web Development
- Great Learning MySQL
